

DECT business telephone

Aastra 622d

The comfortable Aastra 622d is the new DECT business phone. It has a large illuminated 2" graphic colour display and 8 programmable keys provide you with quick access to your favorite functions.

The handset is equipped with a Bluetooth® interface for cordless headsets and comes with an option for a higher capacity battery. Furthermore the GAP standard is supported.

Service facilities like firmware download over air help reducing support costs.¹

The optionally applicable microSD-Card¹ saves the subscription data and the most important local device data as well as your private phone book. This guarantees that if a handset is defective the key data can be quickly transferred to a replacement handset just by moving the card. The new handset can be used immediately without having to subscribe again.

Highlights of the Aastra 622d

- * Colour TFT display (2", 176 x 220 dots, 65,536 colours)
